

Education	Massachusetts Institute of Technology	June 2012
	Bachelor of Science in Computer Science and Engineering	GPA: 4.6/5.0
	Selected Coursework: Artificial Intelligence, Computer Architecture, Computer Systems Engineering, Design and Analysis of Algorithms, Multi-Modal User Interfaces, Performance Engineering, Software Construction, Distributed Systems	
Work Experience	Vecna Technologies	Cambridge, MA
	<i>Software Engineer</i>	<i>October 2012 - Present</i>
	Developed a complex survey application. Led efforts to streamline developer workflows to better support clients and feature development.	
	MicroEval	Palo Alto, California
	<i>Co-Founder & CTO - microeval.com</i>	<i>April 2012 - September 2012</i>
	Co-founded startup that aims to improve employee performance evaluations in the workplace with two others. Responsible for all technical decisions as CTO and built initial code base and development workflow. Developed RESTful PHP API Backend with Kohana Framework and Backbone.js based Front-end. Worked directly with customers and users to improve product. Made key strategic business decisions for company. Sought out and managed contract designers and developers. Participated in the Y Combinator Summer 2012 class.	
	MITx	Cambridge, Massachusetts
	<i>Developer - mitx.mit.edu</i>	<i>December 2011 - May 2012</i>
	Developed features and built infrastructure to support the release of a new online education platform. Coded/designed front-end components (HTML/CSS/Javascript) as well as worked with back-end features in Django. Helped refine and establish development workflow. Created a Javascript based drawing playback system as part of a senior capstone project.	
	Ooyala	Mountain View, California
	<i>Software Engineering Intern</i>	<i>May 2011 - August 2011</i>
	Worked under the scrum methodology on the analytics team with the same responsibilities as a full-time engineer. Pushed out a product by coding across the whole analytics stack as well as working on documentation and coordinating design with product managers. Designed and coded a real-time analytics infrastructure prototype in a two-person team in three weeks which won a company award for best project.	
	Africa Information Technology Initiative	Kigali, Rwanda
	<i>Instructor</i>	<i>March - July 2010</i>
	Chosen as one of four instructors among several dozen applicants to teach a six week computer programming and entrepreneurship course to students at the Kigali Institute of Science and Technology. Was responsible for all aspects of the course including teaching lectures, designing labs, networking with administration, planning logistics, adjusting curriculum, and working with students.	
Skills	Technical: HTML, CSS, Javascript (jQuery, Backbone), SQL, Git, UNIX, PHP, Ruby, Python, Java, Agile Development (Scrum) Non-Technical: Semi-fluent Korean, Conversational Spanish	
Awards & Extra Curriculars	MIT Logarhythms A Cappella Group	<i>September 2008 - May 2012</i>
	MIT Varsity Lacrosse	<i>Spring 2009, Spring 2012</i>
	MIT Asian Christian Fellowship	<i>January 2010 - May 2012</i>
	MIT Varsity Ice Hockey (Captain)	<i>September 2008 - May 2012</i>
	MIT 6.470 Web - Programming Competition - 3 rd Place	<i>January 2011</i>
	MIT Freshman Leadership Program Counselor	<i>June 2009 - September 2010</i>
	MIT 6.190 Web - Based Speech Recognition App Competition - 1 st Place	<i>January 2010</i>
